

The world's best professional core sampler

DipStick-Pro®

Constructed with corrosion resistant machined aluminum and impact resistant resin. This cutting edge technology and design ensures a true core sample, that is repeatable. The DipStick-Pro® features a replaceable wear tip and is available in a standard 10 foot (2 piece) length featuring our NEW Quick Coupling System. Custom lengths are available to meet all of your measuring requirements. An impact resistant carrying case and 6 foot cleaning brush are also available.

12"
Marks

Benefits:

Be able to accurately determine the amount of sludge and scum in septic tanks, digesters and sludge pits. Also great for measuring FOG in grease traps, grease interceptors and lift stations. The readings are accurate and defensible. Very minimal training is required for correct use.

How to Use:

It is a simple 4 step process:

- Insert the DipStick-Pro® into the trap,
- Pull the actuator handle,
- Remove the DipStick-Pro® from the trap,
- Read the amount of scum, sludge and free water.

Scum

Sludge

Application examples:

Grease Interceptors / Grease Traps

Septic Tanks / Lift Stations / Digesters / Sludge Pits

"The Dipstick-Pro® is a great tool, that really takes all the guess work out of inspecting. It is easy to use and transport. Being an inspector I have had to change the frequencies of interceptor pump outs, and when you can bring a manager or owner out to witness a sample and they see the solids and water, and, finally, the grease/oil layer changing, the frequency becomes very easy."

*Michael Bakkum, Inspector,
City of Hillsboro, Oregon*

Ordering Information:

F2624EA	\$299.95	6' DipStick-Pro® & 4' extension featuring our NEW Quick Coupling System
F2624FT	\$10.00	Additional length extension available at \$10 per foot
F2631EA	\$15.00	6' Cleaning Brush
F2630EA	\$59.95	Impact resistant carrying case with quick release end cap
S/H	\$30.00	Shipping charge (outside US, shipping charges vary)

DipStick-Pro® is being used by many waste water professionals including:

City of Clearwater, FL	South Island Public Service District, SC	City of Norman, OK
City of Jackson, MI	City of Loveland, CO	Colorado Springs Utilities, CO
City of Clare, MI	Manatee County, FL	Alderwood Water District, WA
Waterford Township, MI	City of Burlington, VT	City of Hillsboro, OR
N. Davis County Sewer District, UT	City of Puyallup, WA	City of Loganville, GA
Sanitation District #1, KY	Pasco County Utilities, FL	St. Johns County Utilities, FL
City of McMinnville, OR	City of Wilsonville, OR	Delhi Charter Township, MI
City of Tempe, AZ	City of Santa Rosa, CA	Environmental Engineering & Consulting, CA
East Bay Municipal Utility Dept, CA		

Getting the most from Environmental Biotech International

Environmental Biotech International. The world leader in sewer grease technology!

Environmental Biotech International has over a decade of experience designing and implementing wastewater pretreatment and remediation systems for wastewater authorities and wastewater producers. EBI's grease trap design has been adopted by many federal, state, and local wastewater authorities in the US and many foreign countries. As authors of the NEHA accredited course on dealing with grease-laden wastewater, "The Grease Summit", EBI has been recognized for excellence in educational programs for wastewater professionals. For additional information on courses targeting FOG legislation, control, design, inspection and program rollout, visit our website at www.environmentalbiotech.com or contact us at (941) 757-2591.
