

# Eliminate bad odours in your business

## Odour Elimination System (OES)

### The Problem: Bad Odors

Putrid odours linger around rubbish bins and refuse containers; they rise up from floor and sink drains or take up residence in toilets. Cigarette smoke smells plague bar areas and hotel rooms. Equally, foul odour spreads a concern to potential customers of poor hygiene and care standards.

### The Solution

Environmental Biotech's Odour Elimination System (OES) is a low cost permanent solution to odour-related problems. We locate the bad odours and build solutions based on the type of problem. For example, in toilets and washrooms we can offer a dedicated Urine Elimination Service which involves the treatments by us, of wall and floor areas with our own highly proven, 100% effective and well endorsed product. Or alternatively we can supply you with it, to deliver through your own cleaning teams.

*The discreet pipework can be fed through to fit above a door or other non-intrusive area.*

*The OES operating system can sit neatly behind a wall or cupboard.*

### The Service

- Detection and identification of the odour(s) source
- Installation of an atomizer or drip-feed treatment injection system
- Frequent pro-active service visits from trained technicians as required
- Incorporation of environmentally friendly products or systems that actually counteract, break down and neutralise the unwanted odours
- Troubleshooting as necessary
- Detailed auditable inspection reports.

### The Benefits

- Address the source of the problem not just the effect
- Increase customer satisfaction
- Reduce poor image with customers and staff
- Improve health and hygiene standards
- Create a better environment to work in.

### Application examples:

**Refuse Areas, Kitchens, Restaurants, Hotels, Care Homes, Washrooms and Toilets, Bars and Pubs, Shopping Centres.**

Why not try B-UrineFree™ spray to eradicate horrible stale smells from your bar surfaces. Visit [www.environmentalbiotech.com](http://www.environmentalbiotech.com) for more information or to order.
