

Eliminate general yard, farm and stable odours.

Yardfresh & Yardfresh Plus

Intended for professional use, **Yardfresh** is an effective multipurpose odour remover which uses non harmful and non-toxic chemicals to eliminate general yard, farm and stable odours.

Yardfresh is not an ordinary cleaning product – its powerful but environmentally friendly formula was originally developed for water authority odour control systems. Superior in performance, **Yardfresh** cleans and deodorises even the foulest of smells in areas where animals gather and smells linger, such as rubbish collections and toilets.

Safe to use

Yardfresh is completely safe to use and still performs well when used in conjunction with disinfectants, insecticides or other water soluble fluids. **Yardfresh** works by enveloping bad odour molecules in its unique blend and then harmlessly breaks down the odour particles. This effective formula works not only on fresh odours but also those that have persisted for some time, such as dampness. For best external results use **Yardfresh** daily or regularly as required, to ensure odours are kept at bay.

Easy to use

A one litre bottle makes over 100 litres of ready to use **Yardfresh**. Mix it yourself or make it really easy with our automated hose mixing system. It comes in a choice of original or citrus scent and gets to work immediately to ensure your yard area will be fresh in no time at all.

Application examples:

Animal Care Centres, Catteries, Zoos, Breeders, Schools, Stables, Kennels, Farmyards, Refuse Areas.

Yardfresh & Yardfresh Plus

Frequently Asked Questions

Is it safe for use around animals?

Yes, but we encourage you to keep animals clear of the treated area until dry, purely as a precautionary measure.

Is Yardfresh tested on animals?

Neither **Yardfresh** or any of its ingredients are tested on animals.

Where can I purchase Yardfresh from?

By phone or via our website. Please see below for details.

Why not try...

Yardfresh Plus+ is a multi-purpose disinfectant for outdoor use. Odouriser and disinfectant in one handy product.

Concentrate to be used with 32 parts water. Available in 1 litre and 5 litre refills. The hose end sprayer on the 1 litre bottle will automatically mix 32 to 1 and spray over areas like kennels, patios, bins, floors and much more. An alternative to Jeyes Fluid.

Applications:

For deodorising drains, bins, greenhouses; cleaning and disinfecting patios, equipment, utensils, instruments, cages, kennels, stables, catteries and more.

Bactericidal Activity:

When used as directed, this product demonstrates effective disinfectant activity against *Pseudomonas aeruginosa*, *Escherichia coli*, *Klebsiella pneumoniae*, *Salmonella schottmuelleri*, *Salmonella choleraesuis*, *Streptococcus faecalis*, *Shigella dysenteriae*, *Enterobacter aerogenes* and *Staphylococcus aureus*. When used as directed, this formulation is an effective disinfectant against *Pseudomonas aeruginosa* in animal hospitals and laboratories. At 4 ounces per gallon or equivalent dilution rate (30ml / litre active quat), this product is effective against *Bordetella bronchiseptica* (causative agent of bacterial Kennel Cough) on hard, non-porous environmental surfaces. Canine Parvovirus (CPV), Canine Adenovirus (causative agent of Infectious Canine Hepatitis), Canine Coronavirus (causative agent of Canine Coronavirus Disease, Canine Gastroenteritis), Canine Parainfluenza Virus, Feline Panleukopenia (Feline Parvovirus), Feline Rhinotracheitis (causative agent of Feline Herpes virus Infection), Feline Coronavirus (causative agent of Feline Infectious Peritonitis), Feline Picornavirus and Porcine Parvovirus. Canine Parvovirus (CPV) Activity: At this dilution, this product inactivates Canine Parvovirus (CPV) on hard, non-porous, environmental surfaces in the presence of 5% blood serum with a 10 minute contact time.
