

MALEON SCOOPS TOP BUILDING INDUSTRY AWARD FOR MCDONALDS RESEARCH PROJECT WITH ENVIRONMENTAL BIOTECH UK

Environmental Biotech UK's revolutionary preventative drain line management system received industry-wide acclaim recently at The Building Services Awards. The company's unique way of reducing fats, oils and grease (FOG) build-up at four McDonalds restaurants, saw leading building services design consultancy, Maleon, pick up best Public Health Engineering Design Initiative.

David Harding, Technical Services Manager for McDonalds commented:

"Since the trials last Summer, we have been introducing Environmental Biotech UK's Grease Eradication system at a number of restaurants where FOG is a major problem.

Commenting on the wider implications of the trial and subsequent award win, Aziz Tejpar, Managing Director of Environmental Biotech UK commented:

"The results of the trial have already encouraged other commercial premises to follow suite in responsible drain line management.

Environmental Biotech UK can be contacted on 08702 406154 and further information on the company can be obtained by visiting www.environmentalbiotech.co.uk
